SUMMARY

SDET at PharmEasy testing Pharmacy, Diagnostics and Doctor Consultation services: 60+ APIs validated, 45+ defects caught before production, and a Jenkins utility that cut order status changes from half a day to 5 minutes. Builds Java, Rest Assured and Playwright automation with CI/CD, and evaluates AI chatbots for safety, hallucination and regressions. Ex-LG Electronics Spring Boot engineer.

EXPERIENCE

PharmEasy **Bengaluru, India**

Software Development Engineer in Test (SDET) *May 2026 – Present*

- Validated **60+ RESTful APIs** and microservice integrations across **Pharmacy, Diagnostics, Doctor Consultation and other services** using Rest Assured, Postman and cURL across Beta and Staging, validating payloads, status codes and errors.
- Uncovered **45+ defects** in a single major feature, including **15+ backend issues**, before production.
- Engineered **17 automated test scenarios** in Rest Assured (Java) and Playwright for coupon validation and UI flows.
- Used **AI agents across the STLC** (PRDs, test cases, execution) and tested **4 AI chatbot journeys** end-to-end.
- Created a **Jenkins-triggered utility** that cut order status changes from half a day to **5 minutes** via API.
- Owns the **test strategy for Offline Doctor Consultation's partner integration**, covering **15+ scenarios** end-to-end.

SDET Intern *Sep 2025 – May 2026*

- Caught release-blocking issues across API, UI, regression, smoke and mobile exploratory testing; converted to full-time SDET.

LG Electronics **Feb 2025 – Jul 2025**

Software Engineer Intern *India*

- Developed and integrated **3 Java Spring Boot modules** into the core product, delivering new backend features.
- Designed and implemented **scalable RESTful APIs** with MySQL persistence, improving backend reliability.
- Independently led development of a **microservice** and streamlined **CI/CD** workflows for the team.
- Automated testing workflows using JUnit and Postman, **reducing overall QA effort by 25%**.

PROJECTS

PixWipe – AI Background Removal SaaS | GitHub | Demo *Java, Spring Boot, Spring Security, MySQL, React*

- **Spring Boot** backend calling ClipDrop AI via **OpenFeign**, solving **15 complex** ID-photo cases for LG Electronics.
- Secured REST APIs with **Spring Security + JWT** (Clerk JWKS) and synced users via signature-verified webhooks.

MediCart – E-Pharmacy QA Automation Platform | GitHub *Java, Rest Assured, TestNG, Playwright, GitHub Actions*

- Mock e-pharmacy (orders, diagnostics, consults, AI bot) with a **134-test suite** (Rest Assured/TestNG + Playwright) in CI.
- Verified suite quality by **injecting 8 bugs** (stock, coupons, slots, guardrails) and confirming each was caught.

Chatbot Evaluation Harness | GitHub *Python, Playwright, GitHub Actions*

- Built a **56-case golden-set harness** scoring chatbots on safety, privacy, hallucination and intent, with a CI regression gate.
- First run scored **86.7%** and exposed real gaps; fixes reached 100%; injected faults failed the gate.

TECHNICAL SKILLS

API Testing: Rest Assured, Postman, cURL, REST APIs, Microservices
Test Automation: Rest Assured, Playwright, Selenium, Appium (Mobile), TestNG, JUnit (Unit Testing), Maven
Testing: Functional, Regression, Smoke & Exploratory, AI/Chatbot Evaluation, Agile/Scrum
CI/CD, Logs & Tools: Jenkins, GitHub Actions, Docker, Git, GitHub, JIRA, Kibana
Languages & Databases: Java, Python, SQL, JavaScript, MySQL, PostgreSQL, MongoDB (NoSQL)
Fundamentals: Data Structures & Algorithms, OOP, DBMS, Multithreading & Concurrency, Spring Boot, JPA, Hibernate

EDUCATION

Chitkara University, Rajpura **2021 – 2025**

Bachelor of Engineering in Computer Science *CGPA: 8.56 / 10*

ACHIEVEMENTS & CERTIFICATIONS

- **Extra Mile Mastery Award, PharmEasy (2026):** recognised for contributions beyond role expectations.
- **HackEasy, PharmEasy:** 2nd Runner Up 2026 (Swasth Smart Reminders); built a Dify WhatsApp healthcare assistant.
- **Letter of Recommendation, LG Electronics (2025):** for debugging complex issues and cross-team collaboration.
- **Certifications:** Google AI Essentials (Google), Data Structures & Algorithms (Coursera), Intro to Cloud Computing (IBM).
